**DECORATING A COFFEE TABLE**

1

**Candles** add mood and dimension to a flat surface. Scattered about in different shapes and sizes, candles can help break up a coffee table's sheer size. Go flameless if you have children or pets for a worry-free display.

2

**Stacked books**

add character and become great conversation starters. Have fun and refresh the display every season.

3

**Flowers** or live plants are a great way to break up a monochromatic living room.

4

**Natural elements** can add personality to the room while also being functional. A wooden bowl, coral and sand vase filler are easy additions.

5

**Trays** help keep the look organized and are a great foundation for stacking candles, books and other objects.
