

ABOUT ACACIA

Our outdoor Abbott Collection is crafted from Acacia wood, a dense hardwood commonly used for outdoor furniture due to its resistance to decay and mildew.

ABOUT CONCRETE

Concrete Tops are all hand molded and show many surface textures and color variations, giving each its own unique, beautiful characteristics.

WHAT TO EXPECT

This collection has a protective oil finish to help extend beauty of the natural wood color, however overtime it will slowly attain a natural silver-gray patina. This is a purely cosmetic change and will not affect the integrity of the furniture.

Note, as Acacia naturally contains moisture-resistant oil, oil may seep out following the first few rainfalls. To protect cushions from oil residue, remove the cushions before inclement weather. Once the furniture attains a natural silver-gray patina, the furniture oil will no longer bleed.

CARE AND MAINTENANCE

While weathering and color variation over time is natural for wood outdoor furniture, we recommend the following care for best results:

- Store wood furniture indoors out of season. Make sure furniture is completely dry before storage.
- Cover furniture with outdoor covers (sold separately) when left outside during inclement weather or when not in use.
- Wipe spills with a clean dry cloth.
- Avoid the use of harsh cleaners and abrasives.

LONG TERM CARE

To revive weathered furniture, sand and clean the wood to remove all debris and previous treatment. You may then apply any deck stain in the color of your choice. Note that two coats are required to achieve your desired color.

For best results, follow surface preparation and application instructions provided on staining product. To find a selection of stain colors and additional product details, visit our partners at Sherwin-Williams®.
