GYPSY HOOK

Assembly Instructions

Note: For safe mounting, Pottery Barn recommends the following:

- Stud mounting is preferred over dry wall mounting when possible.
- Consult your local hardware store if you have any questions about installing your Accessories.
- Tools needed for installation: Phillips head screwdriver, Measuring Tape, Level and Pencil

Parts Included:

- 2 Screws
- 2 Wall Anchors

Pre-Assembly:

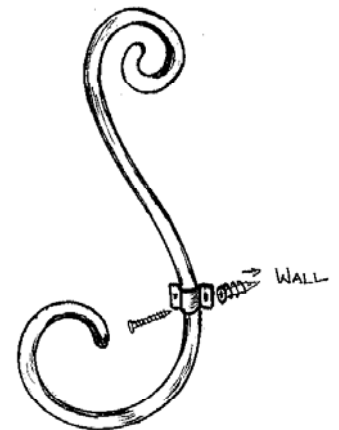

- Remove all parts from the box and lay out on a clear workspace, along with any plastic protective packaging. Do not dispose of any contents until assembly is completed to avoid accidentally discarding small parts or hardware.
- Use the parts list above to identify and separate each of the pieces included.
- Please note failure to follow these instructions may cause improper assembly.

Stud Mounting Instructions:

1. Use a measuring tape and a level to determine the proper placement of the hook.
2. Locate interior wood studs through wall. Place the hook over the wood stud at the desired height. Mark the location of the pre-drilled hook mounting holes on the wall with a pencil.
3. Align the hook mounting holes with the pencil markings; making sure the smooth surface of the hook is against the wall. Insert the metal screws through the holes on the hook. Using a screwdriver, turn the screws clockwise until the hook is secured snugly to the wall.

Dry Wall Mounting Instructions:

1. Place the hook at the desired height.
2. Use a measuring tape and a level to determine the proper placement of the hook.
3. Mark the location of the hook mounting holes on the wall with a pencil.
4. Using a Phillips head screwdriver screw the two dry wall anchors directly into the wall at the two pencil marks. Do not "push" the anchor; it is designed to bore into the wall like a drill bit. Slowly turn the anchor clockwise while applying pressure until the flange just touches the wall.
5. Align the hook mounting holes with the anchor screws; making sure the smooth surface of the hook is facing the wall. Insert the metal screws through the hook holes and place into the wall anchor holes. Using a screwdriver, turn the screws clockwise until the hook is secured snugly to the wall.

Care Instructions:

- Wipe with a soft, dry cloth only.
- Avoid cleaners and abrasives as they may damage the finish.
