Sussex Tirple Glass Shelf

Mounting Instructions

Hardware Included: (8) Anchors
(8) Screws

Tools Needed: Phillips Screwdriver, Pencil,
Level, Stud-finder

The hardware included with this item is meant for Drywall and stud mounting only. If your wall is made from another material such as concrete or plaster, please consult your local hardware store for assistance in selecting the correct hardware.

Mounting Instructions:

1. With the help of another person, hold the Item against a wall at a desired mounting location. Place a level on the glass shelf of the item to ensure the item is level and then use a pencil immediately mark on the wall through each of the eight mounting holes located at the four brackets of the item. Set the item aside. The remaining marks on the wall are the insertion points for the mounting hardware.
2. Use a stud-finder to determine if either mark of Step (1) happens to align with a wall stud. If so, do not try to install an anchor at these marks as the provided anchors cannot penetrate wood studs. **When instructed to do so below, use a screwdriver to secure one of the provided screws through the mounting hole of the item and directly into the wall and aligned wall stud. Refer to step (4).**
3. For marks that do not align with a wall stud, first install the anchors into the wall. To do this, use screwdriver to engage an anchor and then position the anchor tip against the wall at one of the marks. Rotate the anchor clockwise and simultaneously push the anchor into the wall. The anchor will drive itself into the wall like a large screw. Continue rotating until the wide end of the anchor is even with the wall. Repeat for the other anchors with non-stud aligning marks.
4. Reposition the item to the wall so that the mounting holes of the item align with either installed anchors or pencil marks (if there is a stud aligned). Use the screwdriver to secure a provided screw through each mounting hole and into the anchors or studs. Rotate the screws clockwise until tight.
5. The item is now ready to use.

Note: Maximum load capacity for each shelf is 15 lbs (6.8 kgs), total 45lbs.

Care Instructions:

Wipe with a soft, dry cloth. To protect the finish, do not use household cleaners or abrasives.
