Row Of Hooks General Mounting Instructions

Note:

- This hardware is meant for dry wall/stud mounting only. If walls are concrete, brick or plaster, please consult your local hardware store for assistance. For safety and ease of mounting, installation is recommended using two people.
- The weight capacity for this piece is **80** pounds.

Parts Included:

- (3) Toggle anchors
- (3) Toggle screws

Mounting Instructions: (Please use below illustration as a reference)

1. Hold row of hooks on the wall to determine desired location.
2. Mark the location of the screw holes using a pencil.
3. Remove from wall.
4. Use a carpenter's level or measure up from the floor to ensure the row of hooks will be level.

Dry Wall Mounting:

1. Use the #2 Phillips screwdriver to install the toggle anchor(s).
IMPORTANT NOTE: DO NOT USE THE DRILL TO INSTALL THE TOGGLE ANCHORS. Do not force or "pound" the anchor into the wall. The toggle anchor is designed to cleanly cut and bore itself into the wall somewhat like a drill bit.
2. Slowly turn the anchor clockwise while applying even pressure until the flange just touches the wall. If the anchor position is close to a stud (1/2" or less), keep turning clockwise until one of the arrows on the flange is pointing to the 12 o'clock position.
3. Insert the toggle screw into the toggle anchor while turning clockwise. At this point, you will feel a slight resistance. This is the point where the toggle anchor screw is engaging the pivoting portion of the anchor. Continue turning the screw clockwise until the screw head touches the flange. Tighten the toggle anchor screw until it offers strong resistance. At this point the internal pivot will have engaged the backside of the dry wall. Remove the toggle anchor screw, turning counter-clockwise.
4. Place the row of hooks over the mounted toggles to insert the screws
5. Align the row of hooks on the wall over the (3) toggle anchor(s), and insert the (3) toggle anchor screw(s) with the #2 Phillips screwdriver until tight.

Care Instructions:

- Wipe with a soft, dry or slightly damp cloth.
- To protect the finish, do not apply household cleaners or abrasives.
