

P O T T E R Y B A R N

Type Ceramic Hook

Note: For safe mounting, it is important to use the proper hardware for your wall type. Be sure to consult your local hardware store to determine the hardware needed for your wall type (plaster, drywall, concrete, etc.). Mount to wood studs whenever possible. Note: For stud mounting the anchors are not required, use only the screw of the hook.

Note: MAXIMUM TOTAL WEIGHT CAPACITY IS 20 POUNDS (9.1 KG).

Parts and Hardware Included:

- (1) Hook with built-in screw
- (1) Dry wall anchor

Mounting Instructions:

1. Hold the hook at desired location. With a pencil, mark on the wall the screw-hole location. The mark is used to determine the location of the mounting hardware.
2. Remove the hook from wall.

For dry wall mount

3. Use a Phillips screwdriver to insert the wall anchor. Align the tip of the anchor over the mark and rotate the anchor into the wall, turning the screwdriver clockwise and pressing the anchor gently into the wall. Continue rotating the anchor until the flange of the anchor meets flush with the wall.
4. Insert the screw of the hook and rotate the hook by hand (clockwise) until the screw is tight and so that the word on the hook is straight (caution do not over tighten the screw).

For stud mount :

If the desired location for this hook aligns with a stud, do not use the anchor. Simply position the screw of the hook on the mark and rotate the hook by hand while simultaneously pushing the hook into the wall.

Care Instructions:

Wipe with a soft, dry cloth. To protect the finish, do not use household cleaners or abrasives.
