1. *Ensure valve is properly installed according to Installation Sheet provided with valve.*
   *Note:* Specification from finished wall to tip of broached stem is 4”.

2. *Fit faceplate onto valve.*
   *Note:* for tub/shower valves with diverter, screw diverter knob and post (16) onto diverter stem.

3. *Insert handle trim onto stem broach so that escutcheon (20) rests against faceplate (12) and slight clearance is left for handle (20) to rotate freely.*
   *Note:* When fitting handle it may be necessary to shorten broach stem and/or threaded nipple to eliminate gap between handle and escutcheon.
