Ashland
Floor Mount Tub Set

**FEATURES**

- 1/4 turn washerless ceramic disc valve cartridges
- Flow rate 12 gpm (45 lpm) at 45 psi (tub)
- Flow rate 2.5 gpm (9.46 lpm) at 45 psi (hand shower)
- Solid brass construction
- Warranty:
  - Limited lifetime warranty (residential use)
  - One year (commercial use)
- Standard finishes:
  - antique bronze
- Listed by IAPMO, CSA, NSF, and other municipalities
- Shipping weight (lbs.): 30
- Shipping dimensions (in.): 23 x 13 x 18

Note: some building codes require remote pressure balance valves (not supplied) for anti-scald

For technical support, please call 1-888-779-5176
1. Carefully remove all parts from the box.
2. Begin by first installing your coupling
   a. You need to provide two ¾” female NPT couplings
   b. Make sure that the coupling is flush to the finished floor.
   Note: Coupling may be recessed a little from the finish floor but never to protrude higher than the surface of the finished floor. This will prevent the decorative flanges (9) from sitting flush on the finished floor.
3. Screw decorative flange (9) onto risers (8).
   a. Ensure flange is threaded all the way up onto tapered side of ¾” riser.
   Note: One end of riser is tapered and one side is straight thread.
4. Screw risers (8) securely into ¾” female NPT couplings (not provided).
5. Thread flanges (9) down to finished floor and secure with finished screws provided.
6. Mount tub faucet (1) onto risers.

**IMPORTANT INSTALLATION INFORMATION**

- USE TEFILON TAPE OR PIPE SEALANT FOR THREADED CONNECTIONS
- DO NOT USE PLUMBER’S PUTTY ON ANY OF THE BRASS COMPONENTS
  This will cause the finish to tarnish and void the warranty. A non-corrosive Silicone is recommended.
- DURING SWEATING OF LINES DO NOT OVERHEAT CASTING
  Overheating may cause damage to internal mechanism
- COPPER ADAPTORS MAY BE REQUIRED TO COMPLETE YOUR INSTALLATION
