CAUTION:

- BEFORE INSTALLING FIXTURE, MAKE SURE THE POWER TO THE CIRCUIT IS TURNED OFF AT THE MAIN FUSE BOX / CIRCUIT BREAKER UTILITY BOX.

Important Safety Instructions:

- These instructions are provided for your safety. It is very important that they are read carefully and completely before beginning the assembly and installation of this lighting fixture.
- We strongly recommend that a professional electrician install all direct wire fixtures.
- THIS PRODUCT MUST BE INSTALLED IN ACCORDANCE WITH THE APPLICABLE INSTALLATION CODES BY A PERSON FAMILIAR WITH THE CONSTRUCTION AND OPERATION OF THE PRODUCT AND THE HAZARDS INVOLVED.
- The lighting fixture is meant for indoor use. It must be connected only to 3-wire, single-phase electrical supply systems (provided with Ground wire or equivalent protection system).
- For your safety, it is strongly recommended that two people install the lighting fixture.
- This fixture has been rated for up to one (1) 75-watt maximum TYPE A standard incandescent light bulb (not included) or one (1) 18-watt maximum compact fluorescent light bulb (not included) or one (1) 9-Watt SBLED light bulb (not included). To avoid the risk of fire, do not exceed the recommended wattage.
- Use with approved Pottery Barn Shades only, having a minimum opening diameter of 3-1/2 inches and a minimum lamp-to-shade spacing of 2-7/8 inches.
- The lighting fixture is meant for indoor use or covered patios and covered porches that are fully protected from water, even during storms, SUITABLE FOR EITHER DRY OR DAMP LOCATIONS
- Save these instructions.

WARNING:

- To reduce the risk of fire, electrical shock or personal injury, always turn off the light fixture and allow it to cool prior to replacing light bulb.
- Do not touch bulb when fixture is turned on. Do not look directly at lit bulb.
- Keep flammable materials away from lit bulb.
- This lighting fixture contains lead, a chemical known to the State of California to cause cancer, birth defects and other reproductive harm. Wash hands after installing, handling, cleaning or otherwise touching this light fixture.

Pre-assembly:

- Remove all parts and hardware from box along with any plastic protective packaging.
- Do not discard any contents until after assembly is complete to avoid accidentally discarding small parts or hardware.
- For your safety and convenience, assembly by two people is recommended.
TOOLS REQUIRED (not included):

Step Ladder Escabeau Escalera

Parts Included:
(B) Green Ground Screw (1)
(D) Mounting Plate (1)
(E) Canopy screws (4)
(F) Canopy (1)
(G) Set Screw (1)
(H) Socket (1)
(I) Socket Ring (1)

Hardware Enclosed:
(A) Plastic Wire Connectors (3)
(C) Mounting Screws (3) (includes (1) extra)
To Adjust the Suspension Length of the Fixture:

Note: The adjustment or shortening of the lighting fixture's suspension length is only needed if the factory set length is not appropriate for your installation. We recommend that you adjust the lighting fixture to proper desired length before cutting the electrical cord. Determine the lighting fixture suspension length from the ceiling for the product installation, allowing the extra cord length for the outlet junction box wire connections as noted below.

1. Separate the Mounting Plate (D) from the Canopy (F) by removing the 4 Canopy Screws (E). Do not discard the Canopy Screws (E) as these will be used later.
2. Unscrew the Set Screw (G) on the Canopy (F) using a screwdriver by turning counter-clockwise.

Insert the fixture 3 wire power cord through the Canopy (F) to a new desired fixture suspension length and then tighten the Set Screw (G) using a screwdriver. Make sure that the fixture 3 wire power cord will not slip downwards and reliably secured in place.

If needed, cut off the extra power cord length on the 3 wire cord so that they all are at least 6 inches (152.4 mm) long within the outlet junction box (J-box).
Assembly & Installation Instructions:

- SHUT OFF THE MAIN ELECTRICAL SUPPLY FROM THE MAIN FUSE BOX/CIRCUIT BREAKER!
- Carefully unpack all fixture parts and hardware and lay them on a clear workspace.

Separate the Mounting Plate (D) from the Canopy (F) by removing the 4 Canopy Screws (E). Do not discard the Canopy Screws (E) as these will be used later.

1. Gently pull existing wire down from the ceiling junction box and allow wires to hang through the center opening of Mounting Plate (D).
2. Attach Mounting Plate (D) to the ceiling outlet box.
3. Secure the Mounting Plate (D) by tightening 2 Mounting Screws (C) with a screwdriver.

Please read the section "To Make the Wire Connections" Below.
1. With the help of another person, raise the Canopy (F) over the Mounting Plate (D), aligning the 4 holes on the Canopy (F) with the 4 threaded holes on the Mounting Plate (D).

2. Insert the Canopy Screws (E) and tighten to secure the Canopy (F) with a screwdriver.

Unscrew the Socket Ring (I) from the Socket (H) by turning counter-clockwise by hand.

1. Place the lamp shade (not included) onto the Socket (H) and then secure it in place by turning the Socket Ring (I) onto the Socket (H) clockwise until tight.

2. Insert the specified light bulb into the Socket (H). DO NOT EXCEED THE SPECIFIED WATTAGE
To Make the Wire Connections:

1. Gently pull the wiring from the ceiling junction box and allow wires to hang. The HOT or LIVE wire is usually black. The NEUTRAL wire is usually white. Check to see if there is a ground wire that is usually green or green with a yellow stripe or exposed copper metal wire. If needed, use a pair of wire strippers to remove about 1/2 inch of insulation from each wire.

2. Carefully inspect the fixture wires. The NEUTRAL FIXTURE WIRE is White. The HOT FIXTURE WIRE is Black, and the GROUND WIRE is Green. If you have any doubt and cannot identify the power-supply wires with confidence, then we recommend that you ask an electrician and that you not continue with the installation.

3. With the help of another person to hold the weight of the fixture, attach the fixture wires to the junction box wires as shown in the illustrations.

![Diagram of wire connections]

Connect the GROUND FIXTURE WIRE to the GROUND J-BOX WIRE using the Plastic Wire Connector (A) and wrap the connection with electrical tape. Be sure that no wire strands are exposed.

![Diagram of ground connection]

If the junction box DOES NOT have a GROUND WIRE, wrap the fixture's bare ground wire around the Green Ground Screw (B) and insert the screw into the Mounting Plate (D), marked as “GND”, and tighten screw to secure the wire.

![Diagram of neutral and hot connections]

Connect the NEUTRAL FIXTURE WIRE to the NEUTRAL J-BOX WIRE first and then connect the HOT FIXTURE WIRE to the HOT J-BOX WIRE using the Plastic Wire Connectors (A). Wrap these connections with electrical tape. Be sure that no wire strands are exposed.

NOTE:

IT IS IMPERATIVE THAT THE JUNCTION BOX IN YOUR HOME BE PROPERLY GROUNDED!

DO NOT REVERSE THE HOT AND NEUTRAL CONNECTIONS OR SAFETY WILL BE COMPROMISED.

4. Check the wiring connections and if all looks good, gently tuck the wire connections neatly into the ceiling junction box.

Care instructions:

• Wipe clean with a soft, dry cloth or static duster.
• Always avoid the use of harsh chemicals or abrasive cleaners as they may cause damage to the fixture’s finish.

Thank you for your purchase
