1. **Ensure valve is properly installed according to Installation Sheet provided with valve.**
   Note: Specification from finished wall to tip of broached stem is 4”.

2. **Fit faceplate onto valve.**
   Note: for tub/shower valves with diverter, screw diverter knob and post (16) onto diverter stem.

3. **Insert handle trim onto stem broach so that escutcheon (20) rests against faceplate (12) and slight clearance is left for handle (20) to rotate freely.**
   Note: When fitting handle it may be necessary to shorten broach stem and/or threaded nipple to eliminate gap between handle and escutcheon.
