

ABOUT MAHOGANY

Our Chatham collection is crafted from responsibly harvested, plantation-grown Forest Stewardship Council (FSC) certified mahogany and eucalyptus, dense hardwoods that are ideal for outdoor furniture because they're rich in moisture-resistant oils. The wood is stained and protected with a clear top coat.

WHAT TO EXPECT

As typical of outdoor wood, mahogany and eucalyptus will age to a silver gray as the finish weathers and the wood is exposed to the elements. Hairline cracking and/or peeling is inherent in stained outdoor woods and may occur over time and is not considered a defect.

CARE AND MAINTENANCE

While weathering and color variation over time is natural for wood outdoor furniture, we recommend the following care for best results:

- Store wood furniture indoors out of season. Make sure furniture is completely dry before storage.
- Cover furniture with outdoor covers (sold separately) when left outside during inclement weather or when not in use.
- Store cushions separately from furniture to prevent possible transfer of moisture.
- Wipe spills with a clean dry cloth.
- Avoid the use of harsh cleaners and abrasives.

LONG TERM CARE

To revive weathered furniture, sand and clean the wood to remove all debris and previous treatment. You may then apply any deck stain in the color of your choice. Note that two coats are required to achieve your desired color.

For best results, follow surface preparation and application instructions provided on staining product. To find a selection of stain colors and additional product details, visit our partners at [Sherwin-Williams®](#).
