

POTTERY BARN

Display Shelf Galvi 32 In

Mounting Instructions

This item includes two metal Brackets and one galvi shelf.

Max. Load: Under Testing

Note: Assembly by two people recommended. Open the box safely and unpack all the included items. Do not discard packing until assembly is completed.

Hardware Included: (4) Snap-screw, (4) Screws, (4) Allen Screw, (1) Allen Key

Tools Needed: Phillips Screwdriver, Pencil, Stud-Finder and Leveler.

The hardware included with this item is meant for drywall mounting only. If your wall is made from another material such as concrete or plaster, please consult your local hardware store for assistance in selecting the correct hardware.

1. Place the shelf on the floor so that holes provided on the shelf match from the through holes provided on the brackets, insert allen screw and tight with the help of Allen key provided as shown in the illustration. Similarly, attach rest bracket.

2. Now, hold the shelf as per illustration in upright position so that it is level against a wall at a desired mounting location. Use a pencil to mark the wall through each of the four mounting holes. Set the shelf aside and unscrew the shelf from the brackets with the help of allen key provided.

3. The provided Snap-screw cannot penetrate wood studs. Therefore we have to determine if any of the four marks of Step (2) happens to align with a wall stud. Use a stud-finder to determine this. If any mark does align with a stud, use a screwdriver to secure a provided screw into the wall at this mark when instructed to do so below.

4. For marks that do not align with a wall stud, use a screwdriver to install a provided Snap-screw into the wall at the mark. Engage the head of the Snap-screw with the screwdriver and position the Snap-screw's tip at the mark. Rotate the Snap-screw clockwise while pushing it firmly into the wall. The Snap-screw will automatically drive itself into the wall. Continue rotating until the wide end of the Snap-screw becomes even with the wall surface. Do not over-tighten.

5. Now hold the brackets to the wall so that the holes in the brackets align with either installed Snap-screw or a stud. Use a screwdriver to secure a screw through each hole and into the installed Snap-screw or stud. Rotate the screws clockwise until tight. Similarly attach rest bracket.

6. Now place the shelf on installed brackets securely and match the through holes of the brackets to the holes provided on the bottom of shelf, insert allen screws and tight with the help of Allen key provided as shown in the illustration.

Assembly is complete.

WARNING!
DO NOT MOUNT THIS ITEM ABOVE CRIBS, BEDS,
or CHANGING TABLES.

Care Instructions:

Wipe with a soft, dry cloth. Do not use any abrasive or chemical household cleaners.

Thank you for your purchase!
