Mason Mirror with Shelf
Assembly Instructions

- Please read all instructions before beginning assembly.
- For your safety and convenience, assembly by two people is recommended.
- Use the parts and hardware lists to identify and separate each of the components included.
- Save all packing materials until assembly is complete to avoid the accidental discarding of smaller parts or hardware.

TOOLS (Provide by Customer):

Phillips screwdriver  Pencil

PARTS:

(1) Mirror - A

HARDWARE:

(2) Metal Screws (Ø 1/4" x 2") –a  (2) Wall Anchors - b

Mounting Instructions:
1. There is vertical and horizontal hanging style to choice. Determine your desired hanging style and location. Measure the distance between the d-rings on the back of the mirror, making sure the measurements are taken from the centers of both d-rings.
2. Record this measurement on the wall with a pencil. Use a carpenter’s level and a tape measure to ensure a level installation.
3. Stud mounting is always best, so try to position the d-rings over studs if possible. Use a stud finder to locate a stud in desired location. If any of the d-rings align with stud, use provided metal mounting screws. If there is no stud, the wall anchors/metal screws are both required.
**Dry Wall Mounting**

1. Use a Phillips screwdriver to insert the wall anchors (b). Do not “push” or drive the anchors (b) into the wall, it is designed to bore into the wall like a drill bit. Slowly turn the anchors (b) clockwise while applying pressure until the flange just touches the wall.

2. Insert the metal screw (a) into the wall anchor (b) turning clockwise leaving approximately ½” between the back of the screw head and the wall.

3. Align the d-rings over the screw heads and slide the mirror (A) down until the tops of the d-rings rest on the screws. Tighten or loosen screws as needed to fit the mirror snugly against the wall.

---

**Care Instructions:**
- Dust with a clean, soft damp cloth and wipe dry immediately.
- Avoid the use of chemicals and harsh cleaning agents.
