TOOLS REQUIRED: Level, Pencil, Phillips Screwdriver, Stud-Finder, Tape Measure

HARDWARE ENCLOSED: 
- (2) Anchors
- (2) Screws

The hardware included with this item is meant for drywall or stud mounting only. If your walls are made from concrete, brick or plaster, please consult your local hardware store for assistance in selecting the appropriate hardware.

This item includes two Keyholes on the rear surface that are used to hang it on a wall with the mounting hardware. Before you get started, use a tape measure to measure the exact distance between the two Keyholes (measure from center to center of each D-ring). This measurement is "Distance A".

MOUNTING INSTRUCTIONS:
1) With the help of another person, hold the item against a wall at a desired mounting location so that its back faces towards you and you can see the keyholes. Use a level to ensure the item is being held level and then use a pencil to mark the wall on each side of the item adjacent to each D-ring so that the two pencil marks and the two Keyholes are all aligned horizontally. Set the item aside.

2) Connect the two marks of Step (1) with a light pencil line and then use a level to make sure that the line is level too (adjust if necessary).

3) Use the pencil and a tape measure to make two "insertion marks" centered along the line of Step (2) that are spaced apart a distance equal to "Distance A". These are the insertion points for the mounting hardware.

4) Use a stud finder to determine if either insertion mark happens to align with a wall stud. If it does, do not use the provided anchor at that mark because it cannot penetrate wood. In this instance, use a screwdriver to secure a screw directly into the wall and stud at that mark. Rotate clockwise until the screw head resides about 3/8 inch from the wall.

5) For marks that do not align with a wall stud, install an anchor first. To install the anchor, use a Phillips screwdriver to engage an anchor and then, position the anchor tip against the wall at one of the marks. Rotate the anchor clockwise as you push it firmly into the wall. The anchor will drive itself into the wall like a large screw. Continue rotating the anchor until its wide end is even with the wall surface. Do not over-tighten.

6) Use the screwdriver to secure a provided screw into each installed anchor. Rotate the screw clockwise until the screw head is about 3/8 inch from the wall.

7) Mount the item on the wall by hanging the two Keyholes over the screw heads and then slide the item down until it is fully supported by the screws.

CARE INSTRUCTIONS:
- To clean: wipe with a soft, dry cloth.
- Do not use abrasive or strong chemical household cleaners.

Thank you for your purchase!
