TOOLS NEEDED: Level, Stud Finder, Phillips Screwdriver and a Pencil.

HARDWARE INCLUDED: (2) Snap Screws and (2) Anchors.

This item includes five accessible keyholes which are used for wall mounting. We recommend that you use the item itself as a marking template, as explained below:

**Mounting Instructions:**

1) With the help of others, hold the wall art against the wall in a desired mounting position. Use a level to ensure that the item is being held level and then use a pencil to mark the wall through each keyhole. Carefully set the wall art aside. The hardware will be installed at these two marks.

2) The anchors provided with this wall art cannot penetrate wood studs. Therefore we have to find out if either mark of Step (1) happens to align with a wall stud. Use a stud-finder to determine this. If a mark does align, use the screwdriver to install only a screw at this mark - do not use an anchor. Drive the screw directly into the wall and stud until the screw head resides about 3/8 inch from the wall.

3) For marks that do not align with a stud, use a Phillips screwdriver to install an anchor into the wall at these marks. Firmly push the anchor into the wall as you rotate it clockwise. The anchor will drive itself into the wall like a screw. Continue rotating until the wide flange of the anchor is even with the wall.

4) Use the screwdriver to secure a provided screw into each installed anchor. Rotate each screw clockwise until the screw heads are about 3/8” from the wall.

5) With the help of another person, lift the wall art against the wall so that the five keyholes align and engage the protruding screw heads.

**Care Instructions:**

- Dust often with a soft, dry cloth
- Avoid using strong chemical or abrasive cleaners.
