Note: For safe mounting, it is essential to use the proper hardware for your wall type (drywall, concrete, etc.). Be sure to consult your local hardware store for assistance, if necessary. For safety and ease of mounting, installation is recommended using two people.

Parts Included:
- (1) Bar with hooks (A)
- (1) Metal Shelf (C)
- (2) Brackets (B)
- (2) Finials (a)

Hardware Included:
- (2) Screws with washers (b)
- (2) Screws (c)
- (4) Toggle Anchors with screws (d and e)
- (1) Allen Wrench (g)
- (2) Pre-inserted Set Screws (f)

Assemble This Production:
1. Slide the bar with hooks (A) into brackets (B)
2. Attach the finials (a) on both ends of the bar with hooks (A) and tighten them.
3. Use screws with washers (b) to affix the brackets (B) to the metal shelf (C).
4. Use screws (c) to affix the brackets (B) with metal shelf (C).
5. Assembly complete.

Mounting Instructions:
1. Hold the train rack at desired location on the wall. Mark the location of the screw holes using a pencil. Remove from wall. Use a carpenter’s level or measure up from the floor to ensure the brackets will be level.
2. Mount the train rack onto the wall following instructions:
   Use a Phillips screwdriver to insert the toggle anchor (d). Do not “push” or drive the anchor into the wall, it is designed to bore into the wall like a drill bit. Slowly turn the anchor clockwise while applying pressure until the flange just touches the wall. Keep turning clockwise until one of the arrows on the flange is pointing to the 12 o’clock position.
3. Insert the screws (e) into the toggle anchor (d) separately turning clockwise. At this point, you will feel a slight resistance. This is the point where the toggle screw is engaging the pivoting portion of the anchor. Keep turning screw clockwise until the screw head touches the flange. Tighten the screw until it becomes difficult to turn. At this point the internal pivot will have engaged the backside of the dry wall. Remove the anchor screw turning counter-clockwise.
4. Align the train rack over the toggle anchor, and re-insert screws with Phillips screwdriver until tight.
5. Use Allen Wrench (g) to tighten the pre-inserted set screws (f) to affix the bar with hooks (A) to the brackets (B).

* Maximum load capacity: 100 LBS

Care Instructions: Wipe with a soft, dry or slightly damp cloth. Thank you for your purchase.
